**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Lisa Bongiovi on March 30, 2004.

The application has been amended as follows:

Claim 1, last line, “, wherein the thin film transistor is not destroyed” has been inserted after “the corresponding pixel”;

Claim 5, last line, “, wherein the thin film transistor is not destroyed” has been inserted after “the corresponding pixel”.

## **REASONS FOR ALLOWANCE**

2. Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a method for darkening a pixel by darkening a defective pixel for controlling the application of a voltage to a corresponding pixel electrode by a thin film transistor disposed for each pixel comprising a combination of various steps as claimed, more specifically, a part of the pixel electrode is cut by a laser in the vicinity of the contact connecting an electrode of the thin film transistor to the pixel electrode to separate the contact from the pixel electrode and to thereby darken the corresponding pixel, wherein the thin film transistor is not destroyed.

Izuka (' 720) discloses a method for darkening a pixel, however, Izuka fails to disclose "a part of the pixel electrode is cut by a laser in the vicinity of the contact connecting an electrode of the thin film transistor to the pixel electrode to separate the contact from the pixel electrode and to thereby darken the corresponding pixel, wherein the thin film transistor is not destroyed".

Takahara ('113) discloses a method for darkening a pixel comprising a laser light directly focused on the thin film transistor so that the thin film transistor. Takahara fails to disclose "a part of the pixel electrode is cut by a laser in the vicinity of the contact connecting an electrode of the thin film transistor to the pixel electrode to separate the contact from the pixel electrode and to thereby darken the corresponding pixel, wherein the thin film transistor is not destroyed".

Art Unit: 2871

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
